The radiance of trust

## Ring Size Finder

1. Ring measurements are very precise. Carefully follow these instructions to obtain an accurate measurement.
2. Prior to printing, ensure that Page Scaling is set to "None" on your print dialog box. (To open the print dialog box, press CTRL+P.)
3. Measure the bar on the left. It must be exactly 2 inches or 50 mm long

NOTE: In the Print dialog box, make sure that you do not have "Shrink oversized pages to fit paper size"or"Expand small pages to paper size" selected, and that Page Scaling is set to None

1. Measure your size using an existing ring

Place the ring over the circles below, Ensure that the inside of the ring lines up with the outside of the circle. This measurement refers to the diameter of the ring. If you are between sizes, order the larger size.
Eg: If your existing rings internal diameter matches the 4th ring in the rings below, then $D$ : the Diameter of the Ring is $16.2 \mathrm{~mm}, C$ : the circumferece is 51 mm and the RING SIZE is 11.
2. Measure Your finger and compare to the scale given here.

- Measure your finger with a non stretchable string or about 6 inches long by $1 / 4$ inch wide paper.
- Snugly wrap it around the base of the finger that you wish to measure.
- Using a pen mark the line at the point where the string/paper meets, forming a circle.
- Measure the length of the sting/paper. This is the circumference of the ring. You may now refer to the chart below and determine your corresponding size.
Eg: The measurement of the string is the C: Circumference of the ring. If the string/paper measures 48 mm on a footruler, then, the RING SIZE is 8 , as shown in the first circle.

## MEASUREMENTS REFLECT RING SIZES IN INDIA

RING SIZE CHART

| INDIA | Circumference (mm) | Diameter (mm) | USA | UK |
| :---: | :---: | :---: | :---: | :---: |
| 8 | 48 | 15.3 | 41/2 | I |
|  | 48.7 | 15.5 |  | J |
| 9 | 49.3 | 15.7 | 5 | J1/2 |
| 10 | 50 | 15.9 |  | K |
|  | 50.6 | 16.1 | 51/2 | K1/2 |
